### Summary of Continuous Improvement Planning

<b>Briefly list the areas that this plan aims to improve</b>	<b>Briefly summarize the actions the school will take to improve in these areas</b>
ELA	Teachers will provide clear actionable feedback for students on their reading lives that students then take ownership of. Through the use of clear goals for students that help them understand what they need to do to push their reading forward.
Math	An increase in the number of students who can orally and in writing explain their mathematical thinking. Establish an environment where students are given opportunities and encouraged to share their mathematical thinking.
Physical & Mental Wellness-	Increase in the percentage of teachers who believe students have the skills needed to regulate their behavior. Establish structures where students gain social-emotional strategies to help them self-regulate, develop independence, and become lifelong learners.
ELL Progress - ELL population will show increase in areas of ELA & Math through a clear focus on providing individualized reading goals and support around expanding oral language development through the above goals.	Teachers will reinforce oral/aural development via small groups.
